## 2021 NEIGHBORHOOD STREET RECONSTRUCTION PROGRAM (SR-1718)

Dear Property Owner:

The City of Overland Park would like to inform you that your street will be part of the 2021 Neighborhood Street Reconstruction Program. The street improvement project is being managed by the City of Overland Park Public Works Department and designed by the consulting firm, Walter P Moore. The purpose of this project is to reconstruct the existing streets, as they have reached the end of their useful life.

Improvements will include:

- New concrete pavement and curb – the asphalt pavement will be replaced with concrete pavement to provide a longer life pavement with minimal maintenance
- New sidewalk – replace and add sidewalks to improve pedestrian safety
- Storm drainage – improvements as needed to ensure proper drainage
- New street lights – to provide increased safety and pedestrian access

Surveyors with Walter P Moore, will be working in your area collecting topographic information to assist in the design of the project. From this information, they will begin preliminary design.

Enclosed is a resident questionnaire and project area map. The information you provide in the questionnaire will assist us in our evaluation of the neighborhood during the design process. Please return the questionnaire in the enclosed postage paid envelope by April 19, 2019.

After preliminary design is completed later this year, you will receive an invitation to a public meeting where you will be able to review the plans, ask questions, and provide any additional comments. Please feel free to contact me at the phone number or email address listed below if you have any questions or comments at this time.

Sincerely,

Jason Hussey, PE  
Senior Civil Engineer  
City of Overland Park Public Works Department
